## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/30/07 has been entered.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 27-29 and 31 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The disclosure, as originally filed, failed to provide support for "a secondary molding step of filling a second molding die . . . component." The specification supports "filling a third molding die with resin.

4. Claims 27-29 and 31 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for filling resins into two different dies, does not reasonably provide enablement for forming a module component. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make

Art Unit: 3726

the invention commensurate in scope with these claims. The primary molding step lacks a second molding die, and the secondary molding step lacks a third molding die. Therefore, the chip component cannot be molded with the resin as disclosed.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 27-29 and 31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear as to what is the first molding die is peeling off from.

Is the chip component molded with resin again in the forming step of forming a circuit wiring?

What is "a molded element" referring to?

Claim 27, line 5: insert —the—before "insetting".

7. Claims 27-29 and 31 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps.

See MPEP § 2172.01. The omitted steps are: a primary molding-die-forming step and die-peeling, shaping step.

### ***Response to Arguments***

8. Applicant's arguments with respect to claims 27-29 and 31 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

9. Please provide reference numerals (either in parentheses next to the claimed limitation or in a table format with one column listing the claimed limitation and another column listing corresponding reference numerals in the remark section of the response to the Office Action) to all the claimed limitations as well as support in the disclosure for better clarity (optional).

Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as originally filed requires that the applicant point out the support for any amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.
